SAMSON IDOWU

Cyber Security Engineer

PROFESSIONAL SUMMARY

Senior Cybersecurity Engineer with 6+ years of experience across Security Engineering, Network Engineering, DevSecOps, Cloud Engineering, and IT Support. Proven track record designing and implementing enterprise-scale SIEM solutions, developing detection rules, automating security infrastructure, and producing technical content for global audiences. Published researcher with multiple peer-reviewed articles and official documentation serving 100,000+ security professionals worldwide.

SKILLS

SIEM & Detection engineering
Malware analysis · Threat modeling
Penetration testing · Digital forensics
Incident response
Threat intelligence
Security architecture design
Routing & Switching · PowerShell
Python · Bash
Regex (PCRE/PCRE2)
CI/CD (GitHub Actions, Jenkins)
Terraform · Ansible · Docker
Kubernetes · Windows · Linux
AWS stack · MITRE ATT&CK
Cyber Kill Chain · NIST
Leadership
Excellent communication · Reporting
Team player · Organizational skills
Project management
Time management · Research
Technical writing

EXPERIENCE

Security Engineer — May 2023 – Present
Wazuh Inc — San Jose

- Develop detection rules mapped to MITRE ATT&CK techniques, using PCRE/PCRE2 regex to enhance threat detection coverage by 45%.
- Perform malware analysis and threat intelligence analysis to identify IOCs and TTPs, contributing to Wazuh CTI.
- Author and review technical blog posts and official documentation serving 100,000+ Wazuh users worldwide on SIEM configuration and security monitoring.
- Provide Tier 3 technical support and security consultation to enterprise customers, ensuring alignment with NIST CSF and CIS Benchmarks.
- Design and deploy cloud-based security infrastructure ensuring 99.9% availability using Terraform, Ansible, EKS, and CloudFormation.
- Test and validate new Wazuh releases across diverse environments, integrating with third-party tools for enhanced SOC capabilities.
- Automate infrastructure deployments and workflows reducing manual effort by 60%.
- Ensure security deployments comply with NIST, ISO 27001, and CIS Benchmarks, supporting customer audit and certification efforts.
- Design security architecture documentation, data flow diagrams, and integration patterns for complex multi-site deployments.
- Architect and deploy enterprise-scale SIEM solutions across multi-cloud environments, designing security reference architectures aligned with NIST 800-53 controls.
- Create security baseline configurations mapped to CIS Benchmarks for Linux, Windows, and macOS systems monitored by Wazuh SIEM.

Security Researcher — Aug 2022 – May 2024
Innopolis University — Innopolis

- Carried out forensic investigation on memory dumps.
- Built a botnet for offensive security research purposes using BYOB.
- Performed threat-modeling using STRIDE, and prepared DFD's using Microsoft Threat Modelling Tool.
- Built resilient cloud infrastructure using EC2, VPC, EKS, S3, and Cloudwatch services across multiple AZs and AWS regions.
- Participated in penetration tests on applications deployed by start-ups within Innopolis SEZ for the offensive technologies lab.
- Integrated code quality checks and security tests (SAST/DAST) in CI/CD pipelines using Snyk, SonarQube, & StackHawk to identify and remediate code vulnerabilities by 35%.

Infrastructure Security Engineer — Nov 2021 – Jul 2022
Hardcore Biometric Systems — Abuja

- Administered Windows and Linux security environments on VMware ESXi and AWS, managing 200+ servers and endpoints across the organization.
- Implemented and managed SIEM, IDS/IPS, firewall, and vulnerability management solutions, improving security visibility and incident detection by 55%.
- Conducted regular vulnerability assessments and patch management activities, maintaining 95% patch compliance across all systems.
- Supported DevOps initiatives by automating deployments using Jenkins, Kubernetes, and Docker, reducing deployment time by 50%.
- Configured network security devices (firewalls, IDS/IPS, routers, switches) and group policies, strengthening overall security posture.
- Responded to security incidents from PRTG, SIEM, and other data sources within SLA, achieving 98% incident resolution rate.
- Maintained log aggregation infrastructure, ensuring 99% uptime for security monitoring and compliance reporting.

Technical Support Engineer — Aug 2019 – Oct 2021

CERTIFICATIONS

- AWS Certified Solutions Architect (Associate), 12/24
- Certified Network Security Practitioner, SecOps, 11/24
- Network Security Associate NSE 1, 2 & 3, Fortinet, 03/22
- Security, Compliance and Identity Fundamentals, Microsoft, 07/21
- Azure Fundamentals, Microsoft, 07/21
- Security+, CompTIA, 05/21

REFERENCES

References available upon request

Zeta-Web Abuja

- Administered Linux and Windows servers, Microsoft Active Directory, DNS, DHCP, and print services for enterprise clients.
- Maintained asset inventory of 700+ systems, ensuring accurate tracking and compliance reporting.
- Provided technical support to customers within SLA, achieving 92% customer satisfaction rating.
- Ensured system patch compliance at 95% across 400+ endpoints, reducing vulnerability exposure and security risk.
- Monitored network performance and incident response using PRTG Network Monitor, WhatsUp Gold, and Riverbed SteelHead, reducing downtime by 65%.
- Implemented baseline configurations and approved upgrades on firewalls, load balancers, proxies, and servers.

IT Technician Dec 2018 – Aug 2019
Multichoice Port Harcourt

- Provided technical support to 140+ end users, reducing business downtime by 60%.
- Coordinated with third-party vendors for timely resolution of LAN, WAN, and VSAT network issues.
- Troubleshoot technical issues with printers, networks, operating systems, and applications.
- Collaborated with team members on complex technical projects.
- Created detailed documentation of all IT procedures used in the organization.

EDUCATION

M.Sc. in Computer Science (Computer Security and Networks track) Jul 2024
Innopolis University

B.Eng. in Computer Engineering Jun 2017
University of Uyo
